

Blue Waterfall Serbian Bellflower

Campanula poscharskyana 'Blue Waterfall'

Plant Height: 6 inches

Flower Height: 8 inches

Spread: 24 inches

Sunlight: ☉ ●

Hardiness Zone: 3a

Description:

Forms a vigorous mound of star-shaped, light violet-blue bells, with the flowers cascading away from the foliage; spills over the edges of walls and containers, makes a great alpine and rock garden addition

Ornamental Features

Blue Waterfall Serbian Bellflower is blanketed in stunning violet star-shaped flowers at the ends of the stems from early to late summer. Its small round leaves remain light green in colour throughout the season.

Landscape Attributes

Blue Waterfall Serbian Bellflower is an herbaceous perennial with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Blue Waterfall Serbian Bellflower is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover

Planting & Growing

Blue Waterfall Serbian Bellflower will grow to be only 6 inches tall at maturity extending to 8 inches tall with the flowers, with a spread of 24 inches. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
